

# Hook-in Headboard/Footboard Template

1. **Before Printing:** Make sure the page size is set to 100%. If you don't see the toolbar, perform the following: Click **View**, then **Toolbars**, then **Show Toolbars**. Set the page size to 100%

2. For best results, print the hook template on thick paper or card stock.
3. Cut out the hook template (at left) using an X-acto knife or scissors.
4. Remove your current bed rails from your bed.
5. Insert completed template into your bed slots just as you would your bed rails. Does it fit? If so, our hook-in frame should fit your bed.
